

BACTERIOLOGY

Numerous and varied, bacteria can be pathogenic. Molecular biology tools proved their effectiveness in the identification of many bacterial infections.

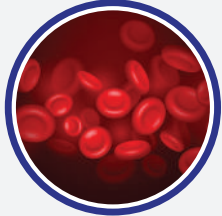

Reference	Description
EBX-005	EurobioPlex leptospira
EBX-013	EurobioPlex Bartonella spp, henselae, quintana
EBX-017	EurobioPlex Coxiella burnetii
EBX-039	EurobioPex Stretocoque Groupe B: SGB, Streptococcus
EBX-034 ^Δ	EurobioPlex T. whipplei
EBX-069*	EurobioPlex Your Dentist LAB: A. actinomycetemcomitans P. gingivalis T.forsythia T. denticola P. intermedia P. micra, F. nucleatum, C. rectus, E. corrodens, C. Albicans

IMMUNOCOMPROMISED

The diagnosis and monitoring of these opportunistic diseases for immunocompromised patients allow to implement and adjust treatment.

Reference	Description
EBX-015	EurobioPlex BKV
EBX-016	EurobioPlex JCV
EBX-024	EurobioPlex HHV6, HHV8
EBX-026	EurobioPlex EBV
EBX-027	EurobioPlex Parvo B19
EBX-028	EurobioPlex JC, BK
EBX-070*	EurobioPlex CMV

ABOUT

Eurobio Scientific

As a partner of long time in the medical industry. Eurobio Scientific offers innovative products and services adapted to the needs of medical analysis and research laboratories.

RESEARCH & DEVELOPMENT

Our production and Research and Development sites are located in France close to Paris.

Our company's main commitment lies in the desire to provide its customers with innovative and quality solutions combined with high-level services.

SCIENTIFIC

EurobioPlex

Eurobio Scientific develops and produces
One-step Real-time qPCR kits for human
infectious diseases

BREBS01-101225

COMPANY BROCHURE

STANDARDIZED PROTOCOLS

Kits designed to be homogeneous for a maximized flexibility

UNIVERSAL

Compatible on most Extraction and Amplification platforms

SAMPLES

Validated on relevant sample types

VARIOUS FORMATS

50 tests/100 tests/ others formats available

EXPERT SUPPORT

Scientific support team to assist customers

RELIABLE

CE marked kits with high sensitivity and high specificity

RESPIRATORY INFECTIONS

Acute respiratory infections can affect the upper and lower respiratory tract. They can be the cause of major epidemics, such as SARS-CoV-2 (COVID-19). The identification of the pathogen is important for the patient care.

Reference	Description
EBX-001	EurobioPlex Bordetella pertussis, parapertussis
EBX-041	EurobioPlex SARS-CoV-2 multiplex
EBX-043	EurobioPlex SARS-CoV-2, Influenza A, Influenza B
EBX-062*	EurobioPlex Respiratory Panel 1: Enterovirus, H parechovirus, Rhinovirus, Metapneumovirus
EBX-063*	EurobioPlex Parainfluenza Virus PIV1, PIV2, PIV3, PIV4
EBX-066	EurobioPlex SARS-CoV-2, Influenza A, Influenza B, RSV

SEXUALLY TRANSMITTED INFECTIONS

Every day in the world, more than a million people contract a sexually transmitted infection.

Reference	Description
EBX-011	EurobioPlex HSV1-HSV2-VZV quantitative
EBX-051	EurobioPlex MultiFast STI: C. trachomatis, N. gonorrhoea, M. genitalium, T. vaginalis
EBX-053*	EurobioPlex Vaginosis: G. vaginalis, A. vaginae, Megaspheara
EBX-054 ^A	EurobioPlex Genital Ulcer: HSV1, HSV2, VZV, CMV, LGV, H.ducreyi, T.pallidum

GASTROINTESTINAL INFECTIONS

Acute gastroenteritis is an inflammation of the digestive tract responsible for diarrhea, abdominal pain and vomiting. It is most often infectious and caused by virus. It can also be bacterial or

Reference	Description
EBX-025	EurobioPlex Norovirus GI, GII
EBX-055*	EurobioPlex Multi-Fast GI Bacteria
EBX-056*	EurobioPlex Multi-Fast GI Virus
EBX-057*	EurobioPlex Multi-Fast GI Parasite

TROPICAL DISEASES

Tropical diseases are prevalent in tropical and subtropical regions, with a substantial health & economic impact.

Reference	Description
EBX-009	EurobioPlex Chikungunya & Dengue
EBX-012	EurobioPlex Zika virus PCR quantitative
EBX-018	EurobioPlex Dengue typing 1,2,3,4
EBX-033*	EurobioPlex Plasmodium
EBX-050	EurobioPlex Chikungunya Dengue Leptospira
EBX-060 ^A	Eurobioplex Monkeypox Screening Test: hMPXV, VZV, Measles
EBX-061 ^A	Eurobioplex Monkeypox Screening Test II: hMPXV, HSV1, HSV2, VZV, EV

GENETICS & CONTROLS

In the midst of the diagnostic revolution, genetic tests and PCR are coming together to offer an unprecedented perspective on mutation detection, diagnosis and management of numerous genetic disorders.

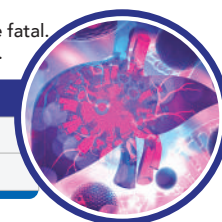

Reference	Description
EBX-002	EurobioPlex DNA QC
EBX-003	EurobioPlex RNA QC
EBX-008 ^A	EurobioPlex HTLV1 & 2
EBX-100 ^A	EurobioPlex Male Gene Fertility

HEPATITIS

Hepatitis is an inflammation of the liver that can cause many health problems and be fatal. Screening and monitoring sick people is important to reduce the impact of hepatitis.

Reference	Description
EBX-010	EurobioPlex HEV PCR quantitative
EBX-071	EurobioPlex HDV PCR quantitative

NEUROINFECTIONS

Infectious meningitis comes from an infection of the cerebrospinal fluid, mainly due to viruses. Bacterial meningitis is less frequent but more serious.

Reference	Description
EBX-011	EurobioPlex HSV1, HSV2, VZV quantitative
EBX-020	EurobioPlex community acquired meningitis Panel: N. meningitidis, S. pneumoniae, H. influenzae
EBX-021	EurobioPlex nosocomial meningitis: S. aureus, P. aeruginosa
EBX-022	EurobioPlex materno-fetal meningitis: S. agalactiae, L. monocytogenes, E. coli

FUNGAL INFECTIONS

Invasive or superficial mycosis requires appropriate treatment, early diagnosis is the

Reference	Description
EBX-006	EurobioPlex Pneumocystis jirovecii quantitative
EBX-073	EurobioPlex DermaScreen
EBX-074*	EurobioPlex DermaTyping
EBX-077	EurobioPlex DermaXtract
